SLR sales were falling in 1983 from the markets 1981 peak, and Canon chose to try greater automation to revive sales and remain competitive. The T50 had a power winder built in giving a continuous shooting rate of 1.4 frames per second, as well as an advanced autoexposure mode, although it was still a manual focus camera. Unlike those compact cameras and the higherend models in the T series, the T50 did not have power rewind, relying on a manual crank. The cameras electric systems were powered by two AA batteries in the grip, which gave enough power to shoot 75 24exposure rolls, or 50 36exposure rolls.Canons previous A series cameras used a horizontally travelling cloth shutter, while the T50 and subsequent T series models used a vertically travelling metal blade shutter which allowed for faster shutter speeds and higher flash Xsync speeds. Only a modest increase was seen in the T50; more would be available in subsequent cameras.A couple of years earlier, Konica had tried a similar approach with their FP1.This simpletouse flash used an infrared preflash to judge the distance to the subject, and only had two buttons; a power switch and a film speed setting which toggled between 100 and 400 ISO film speed.Please help improve this article by adding citations to reliable sources.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Einar Longva 1.0 out of 5 stars I was in Japan at the time and was fortunately able to purchase a Canon AE1, which can do both manual and point and shoot, for roughly the same price. Also, the original bundle didn't include a lens protector, something fairly basic and cheap that should definitely be included in a beginner's bundle. In excellent quality and great for my beginning photo class. They are simple manual film cameras and are great for learning photography or just taking great photos on film. I have a few film cameras left and I like the photos better than the digital cameras produce.

It is harder to get film developed now but you can find professional developers that charge low rates for a roll of film and you always have your negatives to use if more prints are desired. I had to use a winebottle corkscrew to pull these out. So I figure Im okay no matter how I slice it. The T50 was the lowend of the line, the T70 was the middle and the T90 was the best, with the T60 and T80 slipping inbetween accordingly. But its more compact and lighter than its A series predecessors, it runs on AA batteries instead of something oddball, and it has a builtin motordrive but you still have to rewind by hand. Its all black and it was a pointer to the way forward. Ive been shooting with the Canon AE1 Program camera since 1982 and since then, many other models using the Canon arsenal of FD lenses. Ive simply ignored the 1983 T50—mostly because the camera is completely automatic. I couldnt resist so I purchased not one but two T50 cameras on ebay here in the states. The manual focus Canon T50 is most likely the simplest camera in the FD arsenal. Program Off Battery Check are the only top controls. This gives you the limited choice option of going manual and allowing the use of offbrand flashes. The T50 is simplistic joy—allowing me to concentrate on my shots and leaving the exposure chores to the camera. As an allmanual photo guy—I must admit, it was difficult giving up the control of shutter and aperture, but the results were more than pleasing. Canon T50 test shots Butler, NJ USA Canon designed the 244T flash specifically for use with the T50. While other flashes work just fine, the Canon 244T performed the best.Pretty pleasing results considering the T50 shutter is limited to a 2 second exposure.
